application	up-to-date	Now Released
Mobile Apps	Ver. 2.1.0	Ver. 2.2.0
Web App	Ver. 2.1.0	Ver. 2.2.0

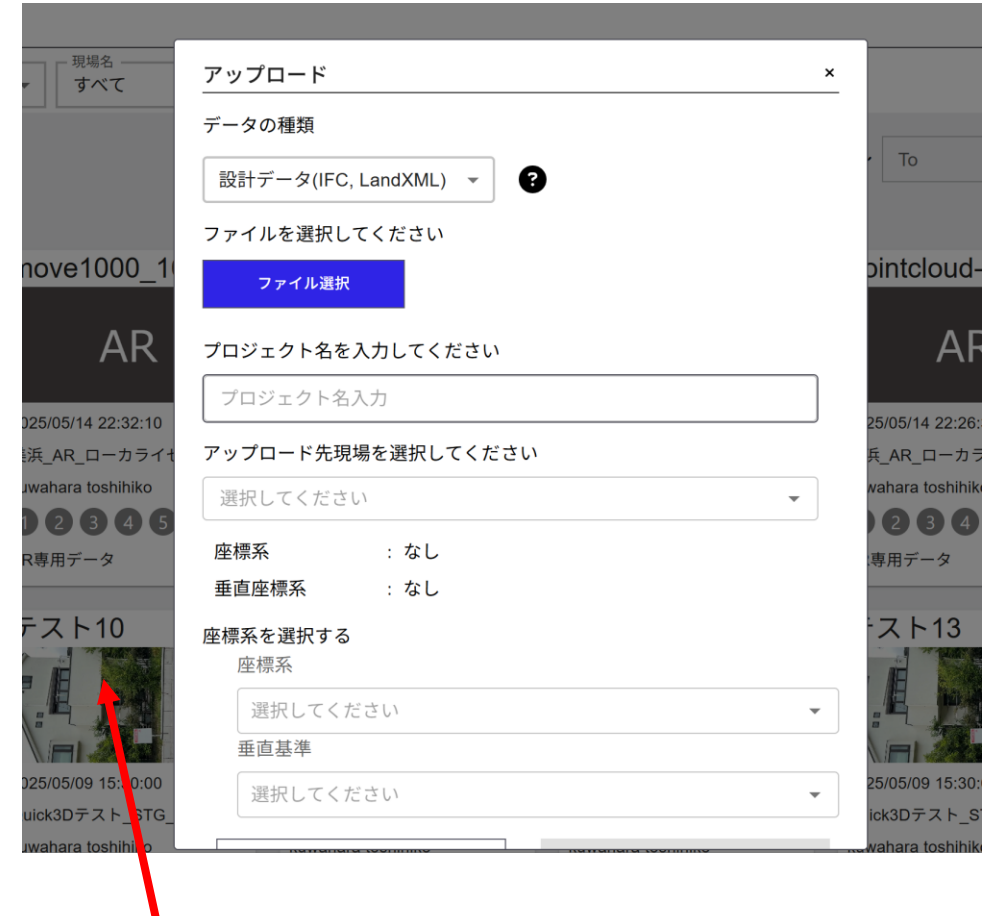

NO.	Target Functions	subject (of taxation, etc.)	summary	Details
1	Project List	Mobile Apps	Additional features. Upload data from mobile devices by reviewing processing flow The time it takes to do this has been reduced.	As shown on the left.
2	Project List Project Details	Mobile Apps Web App	Functional improvement. Clicking on anything other than a dialog does not close the window.	See explanation on p. 2.
3	Project List	Mobile Apps	Additional features. The estimated time to complete SfM processing is now displayed. (We will try to indicate this in the email.)	Explained on p. 3.
4	Project Details	Mobile Apps Web App	Defective response. When selecting hBG18 for AR display, there was a bug that caused it to be displayed incorrectly.	As shown on the left.
5	Project Details	Mobile Apps Web App	Defective response. When displaying a point cloud after selecting a photo taken, a background color other than the original background color was sometimes displayed.	As shown on the left.

conventional

Previously, if you clicked on a non-dialog area
In some cases, the dialog would close.

After this release

After the release, you can click anywhere
outside of the dialog.
The dialog is no longer closed.
